

# mbNET.mini

## The compact solution for data connection

Small but powerful – the mbNET.mini can be to be install in locations where area is limited and provides sufficient connectivity to machines and systems via LAN, WAN or modem. The mbNET.mini guarantees a secure and reliable connection to machines and equipment over the mbCONNECT24 portal, mymbCONNECT24.hosted, as well as midi and maxi appliances. This device can connect to the portal server via a signal from two digital inputs or via a trigger from an Alarm-SMS/-Mail.

### Compact and effective MDH 860

- 1 WAN-interface
- 3 LAN-interface (3-Port Switch)
- 1 USB Host
- 2 Digital inputs
- Connection only to portal (mbCONNECT24, mymbconnect24.hosted, .midi, .maxi)

### MDH 861

- 4 LAN-interface (4-Port Switch)
- 1 USB Host
- 2 Digital inputs
- 1 SIM card slot
- 1 3G modem

Supported networks  
Supported frequency bands  
HSxPA class

Fielding country  
Connection only to portal

GPRS | EDGE | UMTS | HSPA+  
800, 850, 900, AWS 1700, 1900, 2100 MHz  
Downlink HSDPA Category 14 (21 Mbps),  
Uplink HSUPA Category 6 (5,76 Mbps)  
Global  
(mbCONNECT24, mymbconnect24.hosted,  
.midi, .maxi)
