

Description

- 1-10 metre sensing range
- 34 to 194 cross scanning beams
- Active height of 650 mm to 1800 mm
- Detector length of 850 mm to 2000 mm
- Cable or plug connection
- Automatic sensitivity adjustment
- Water-resistant, slim line (12x30 mm) detector housing
- Power, output and signal status indicators
- 12 – 36 V dc supply voltage
- Master/Slave synchronisation and multiplexing
- 5 wire, solid state relay output
- Electrically synchronised

The SG 10 M/S light curtain system consists of a self-contained transmitter detector, SGT and receiver detector, SGR, which are to be positioned opposite of each other. The detectors are housed in a water-resistant, aluminium profile available in a slim line design (12 x 30 mm).

The SGR is supplied with a 12 – 36 V dc power supply with a 5 wire, solid-state relay output, in light operated function. The system offers a Master set and Slave set which can be wire connected together to form a system of two light curtain sets which are synchronised and multiplexed, ensuring that optical cross-talk between the two sets is prevented. The Master set can also operate as a stand alone system. Transmitter and receiver detectors are electrically synchronised.

The advanced automatic signal-tracking (AST) feature ensures that no onsite set up or adjustments are required. The signal level of each individual channel is adjusted automatically, which compensates for misalignment and contamination during operation.

Specialised signal processing technology, designed for outdoor environments, reduces the risk of false detections of water, rain or snow that may pass between the detectors during operation.

Both the transmitter and receiver detectors are protected against reverse polarity of power supplies, control input and output signals. The output is also protected against short circuit and inductive loads.

Technical Data

			46 mm channel spacing		92 mm channel spacing	
			SGT	SGR	SGT	SGR
Supply voltage			12 – 36 V dc			
Current consumption			Max. 100 mA	50 mA	Max. 100 mA	50 mA
Output rating Solid state			–	200 mA	–	200 mA
Short circuit protected			–	Yes	–	Yes
Reverse polarity protected			Yes			
Light source			Infrared (880 nm)	–	Infrared (880 nm)	–
Number of channels (diodes per detector)			16, 24, 32 or 40		8, 12, 16 or 20	
Number of cross scanning beams			74, 114, 154 or 194		34, 54, 74 or 94	
Active height			695, 1065, 1430 or 1800 mm		650, 1020, 1385 or 1755 mm	
Channel spacing			Between channel 1 and bottom of housing: 25 mm Between other channels: 46 mm		Between channel 1 and bottom of housing: 25 mm Between other channels: 92 mm	
Distance between beams at pinch point			23 mm		46 mm	
Response time			–	< 170 ms	–	< 90 ms
Power on indicator			Green LED			
Output indicator			–	Yellow LED	–	Yellow LED
System status indicator			–	Red LED	–	Red LED
Time-out function			–			
Housing dimensions (w x d) Slim Line C			12 x 30 mm			
Housing material Profile Lens cover			Aluminium (black anodised)			
			Polycarbonate			
Connection			5 m fixed cable or 0,5 m cable with 5 pin, M12 plug
